DITEC SECTOR PLUS

The maximum visibility door
for increased safety

www.ditecdoor.com

DITEC SECTOR PLUS

The Ditec Sector Plus is a compact door suitable for narrow spaces, with optional full transparency. The self-testing bottom edge and semi-automatic opening feature assure safety.

Improved working conditions

OPTIMIZED PROCESS FLOW

The counterweight allows the door to open and close fast. With the INVERTERmotion, speed can be differentiated and increased up to 1.5 m/s.

ENERGY SAVINGS

The high operating speed avoids the doors remaining open longer than needed. Thus, the working environment remains stable and energy can be saved.

WIND RESISTANCE

Aluminum or steel bars reinforce the curtain against wind loads.

Anti-Crash system

Safety assured

PROTECTION OF PEOPLE & GOODS

The self-testing, sensible bottom edge and the photocells detect possible obstacles and reopen the door when needed.

EMERGENCY OPENING

In case of emergency, a red handle can be turned to release the counterweight and open the door.

Emergency opening

Smart & nice design

ITALIAN LOOKS

Sector Plus doors offer the possibility of a modular curtain, which allows for full transparency. Reinforcement bars ensure that the curtain is nicely stretched. The compact columns provide an elegant appearance.

LOW MAINTENANCE

Counterweights reduce the efforts required by the motor, resulting in a longer lifetime and less maintenance costs. The Ditec original ACS break-away system avoids further damage to the aluminum bottom bar and steel columns in case of crash. It features so-called safety shoes that can easily be replaced by a non-specialised engineer. With a modular curtain, damaged sections can easily be substituted, without changing the entire curtain.

SPACE SAVING

The Ditec Sector Plus is a compact door, with built-in counterweights and motor. The self-supporting frame and the absence of a side-motor allows for installation in a corridor or any other limited space.

Modular sections

© Entrematic Group AB – 2018

Entrematic offers a comprehensive range of products for industrial, commercial, institutional and residential applications, including sectional doors, loading dock equipment, high-performance doors, residential garage doors, pedestrian doors, gates and barriers, and automation and operators. Built on nearly 200 years of accumulated expertise, Entrematic aims to be the most dynamic, innovative company in the entrance automation industry, and the best partner for dealers and installers.
